

Ameriphone AM 6000 AlertMaster® Wireless Notification System (from Clarity)

Designed for people with moderate to profound hearing loss. Ideal for the Deaf. The AM6000 is an AM/FM alarm clock radio that can be used to alert you to telephone calls and the doorbell, and has optional accessories that can alert you to an audio alarm, a crying baby or the presence of an intruder.

- **Flashes a connected lamp and shakes your bed to alert you to activities within the home**
- **Includes powerful bed shaker for wake-up notification**
- **Includes wireless doorbell**
- **Distinct flashing patterns and lighted icons on unit help you distinguish between the telephone and the doorbell**
- **Simple set up - no hardwiring required, just plug it in**
- **Lighted LEDs indicate the following events: ringing telephone, alarm clock, doorbell, loud sound, motion sensor or audio alarm (may require optional accessories)**

Options:

- **Wireless Remote Receiver AM-RX2**
- **Audio Alarm Monitor AM-AX**
- **Personal Signaler AM-PX or Personal Tactile Signaler AM-PXB**
- **Baby Sound Monitor AM-BX**
- **Door Announcer AM-DX**
- **Motion Sensor AM-SX**
 - **See next page for more info on Optional equipment**
